

It's clear to me that the FCC intended the "Family" Radio Service to be used primarily by private individuals for mostly recreational purposes. Despite that, I'm forced to oppose this petition.

I see no way for the FCC to enforce the proposed ruling. The absense of FCC enforcement will undoubtedly lead to vigilante enforcement. Nothing good can come from that.

Until such time as the FCC can devote the necessary resources to actively patrol and enforce such regulations, I suggest minimizing them. Allow freedom and competition to resolve any problems naturally.
